## Call for Papers

The 2009 Australasian Conference on Robotics and Automation (ACRA'09) will be held on 2-4 December 2009 in Sydney on the main campus of the University of Sydney.

Since 1999, ACRA has brought together Australian and New Zealand researchers and students in the fields of robotics, automation and mechatronics providing a forum to present a breadth of research activities to the wider Australasian community. It has also provided participants the opportunity to network and interact professionally and socially.

Prospective authors are invited to submit their papers in PDF format. Six to ten pages in the standard ACRA format (templates available from website) are allowed for each paper including figures. ACRA 2009 will be a single tracked conference (no parallel sessions or posters).
